Dental School Adminstrators

84/85

Supplement 1
to the
Anuual Report 84/85
Dental Education

INTRODUCTION

The Annual Report on Dental Education and its companion supplements are intended to provide the Commission on Dental Accreditation, the community of dental educators and practitioners, state and federal agencies, and other interested groups with information on various aspects of dental education. The purpose of the present supplement, Dental School Administrators, is to provide a listing of the administrators of the seventy dental educational institutions in the United States, Puerto Rico and Canada. This listing is organized according to institutions ordered alphabetically by state. The information contained in this supplement was obtained from the Annual Survey of Predoctoral Dental Educational Institutions, American Dental Assocation.

INTRODUCTION

The supplements to the Annual Report on Dental Education are intended to provide the Commission on Dental Accreditation, dental educators and practitioners, state and federal agencies, and other interested groups and individuals with information on various aspects of dental education. The purpose of the present supplement, Dental School Tuition, is to provide information regarding the tuitions and fees for the sixty dental educational institutions located in the United States and Puerto Rico. Specifically, the information being reported in this supplement includes resident and non-resident tuitions, general fees, and other fixed costs associated with instruments, textbooks, and health services. The information in this report was obtained from the 1984-85 Survey of Predoctoral Dental Educational Institutions, American Dental Association.

Table 1 of the present report provides a yearly summary of the resident and non-resident tuitions associated with each of the sixty dental schools. As shown, the dental school tuitions, for each year, for residents ranges from a maximun of $19,200 at the University of the Pacific to a minimun of no tuition at both the University of California, San Francisco and the University of California, Los Angeles.* It should be noted, however, that the University of the Pacific has a three-year program.

---

*See Table 2 for tuition plus mandatory fees.

As such, the total undergraduate tuition for this institution is less than for a number of other four-year programs with lower yearly tuitions. It also should be noted that Harvard University has a five year program.

Table 2 provides a listing of first-year resident and non-resident tuitions rank ordered by the ratio of non-resident to resident tuitions. Tables 3, 4, 5, and 6 provide a listing of the undergraduate fees, and instrument, textbook, and health service costs for dental institutions for the four years of the undergraduate programs.

Tables 7 and 8 show resident, first-year costs rank-ordered by tuitions and fees. Table 7 shows a rank order for all institutions, and Table 8 shows rank orders for institutions grouped according to their status as public, private, or private-state related institutions. Tables 9 and 10 provide the same information; however, the institutions are rank ordered according to costs.

The remaining four tables provide lists of institutions and associated total undergraduate costs for residents and non-residents. These lists are rank ordered by total costs and by total costs within types of institution.

An examination of the trends in total undergraduate costs for residents over the five-year period beginning in 1980 and ending in 1984 shows a consistent yearly increase in median costs.

On average, there has been an 11.4% yearly increase in costs over the five years, with an increase of 12.3% occurring between 1983 and 1984. The yearly median costs for the years 1980 through 1984 are $17,196.50, $18,911.00, $21,197.00, $23,555.00, and $26,453.50, respectively.

INTRODUCTION

The supplements to the Annual Report on Dental Education are intended to provide the Commission on Dental Accreditation, dental educators and practitioners, state and federal agencies, and other interested groups and individuals with information on various aspects of dental education. The purpose of the present supplement, Dental School Admission Information, is to provide information regarding admissions and the admissions policies of the 70 dental educational institutions located in the United States, Puerto Rico, and Canada. Specifically, the information being reported in this supplement includes the number of applications received by dental schools, the academic qualifications of first-year students, the criteria employed in the admissions process, advanced placement for transfer students, first-year tuitions and annual related educational expenses, and combined degree programs in dental schools. The information in this report was obtained from the 1984/85 Survey of Predoctoral Dental Educational Institutions, American Dental Association.

Table 1 reports the total number of applications filed at each individual dental school for admission into the 1984/85 freshman class. The total number of applications filed at United States dental schools was 35,413. This is a decrease of 6.7% from the number reported last year (37,949). There were a total of 26,006 (73%) applications filed by males and 9,407 (27%) filed by females. The first-year enrollment also is reported in Table 1. There were 3,678 (73%) males and 1,369 (27%) females accepted in the 1984 freshman class. Therefore, the application/acceptance ratio for males and females was comparable.

Please note that each applicant applies to approximately five schools. This makes the number of applications received by the schools (as listed in Table 1) much greater than the number of individuals applying to dental school. For the year 1984, there were 35,413 applications received by the schools, these applications were submitted by 6,490 students. The actual ratio between individual applicants and accepted first-year students is 1.3 to 1.

Table 2 reports the average Dental Admissions Test (DAT) results and Grade Point Averages (GPA) for the 1984/85 freshman class. The mean DAT academic average was 4.47, with 13 schools reporting an average score of 5 or better. The mean DAT perceptual ability test score was 4.61, with 13 schools reporting an average score of 5 or better. Both the 1984 overall mean academic average and mean PAT score increased slightly from last year's mean values. The mean academic average for 1983, first-year students was 4.45, and the mean PAT scores was 4.55. The mean predental science GPA for the 1984 entering freshman class was 2.92 while the mean predental non-science GPA was 3.25. The mean science GPA decreased slightly from the 1983 mean of 2.98, whereas the mean non-science GPA remained essentially the same for 1983 and 1984.

Table 3 reports the DAT scores used in the admissions process for the 70 United States and Canadian dental schools for the 1984/85 academic year. An examination of the tabled entries indicates that all 60 dental schools in the United States employ the DAT academic average and perceptual ability test results in the admissions process.

Table 4 reports the predental grades used as admissions criteria by the same set of institutions. As shown, all 60 dental schools in the United States employ the predental science GPA in the admissions process. This table also indicates whether interviews, recommendations, and manual dexterity tests are used. Finally, the number of required years of predental education are reported. As shown for the 60 dental schools in the United States, three institutions require four years of predental education, 36 require three years, and 20 require two years.

Tables 5 and 6 show the relative rank of importance associated with the various criteria included in the admissions process for each of the 70 dental schools in the United States and Canada. The median values reported for the criteria indicate that DAT academic averages, DAT perceptual ability test scores, DAT science scores, as well as predental science and overall GPAs, are important criteria for most institutions. Admission interviews also are ranked as important at many institutions.

Table 7 shows possible advanced placements for transfer students. Columns 6 and 7 indicate whether the school grants credit for certain courses only or for an entire term.

Table 8 reports the first-year tuition and related educational costs for the 1984/85 academic year. Columns 2 and 3 indicate the resident and non-resident tuitions, column 4 indicates the amount charged for general fees for the first year, columns 6 to 9 indicate other educational costs for all four years. The average first-year resident tuition for all institutions in the United States is $6,703 while that for public institutions is $3,163, private institutions is $12,391, and private-state related is $10,086.

Table 9 reports the dental schools which offer combined degree programs. An examination of the table indicates that 19 dental schools offer a combined D.D.S.-Ph.D. program, 17 schools offer a combined D.D.S.-M.S. program, six schools offer a combined D.D.S.-M.P.H program, and three schools offer a combined D.D.S.-M.D. program.

15 Current Fund Expenditures: Other Educational Expenses by Size and Type of Institution-Fiscal Year Ending June 30, 1984 . . 30

16 Current Fund Expenditures: Summary of Expenses by Size and Type of Institution-Fiscal Year Ending June 30, 1984 32

INTRODUCTION

Supplement #4: Financial Report/Fiscal Year Ending June 30, 1984 is a summary of the information contained in the eighteenth Survey of Predoctoral Dental Educational Institutions. It constitutes a report of the financing of all 60 U.S. dental schools. The contents of the survey represent a collective action of the Council on Dental Education of the American Dental Association and the American Association of Dental Schools.

Organization of the Report

Table 1, Summary of Revenues, provides a statement of income for all major sources of income identified in the survey.

Table 2, Summary of Expenditures, provides a statement of expense for those major expense categories separately identified in the survey.

Tables 3 to 16, Current Fund Revenues and Expenditures by Size and Control, provide more detailed data for selected categories of income and expense. Each display format includes the following data: 1) highest figures reported for the category; 2) lowest figure reported for the category; 3) mean for the category (average for all schools with non-zero entries in the category).

NOTE: Extreme differences between the high and low figures can reflect differences in accounting procedures among the institutions as well as real differences in income or expense.

Table A

Fiscal Statistics For Fiscal Years 1981-82, 1982-83, and 1983-84

	FISCAL YEAR			PERCENT CHANGE	PERCENT OF REVENUES	
	1981-82	1982-83	1983-84	1982-83 to 1983-84	FYE 1983	FYE 1984
TOTAL CURRENT FUND REVENUES	$665,168,213	$699,848,236	$735,193,230	+5.1	----	----
STUDENT TUITION AND FEES	$147,307,640	$164,990,088	$172,088,189	+4.3	23.6	23.4
STATE AND LOCAL SUPPORT	$306,571,762	$327,674,218	$340,682,297	+4.0	46.8	46.3
FEDERAL SUPPORT	$ 71,351,040	$ 64,901,835	$ 66,418,029	+2.3	9.3	9.0
TOTAL CURRENT FUND EXPENDITURES	$687,288,608	$715,418,385	$758,379,102	+6.0	----	----

General Editing Policy

Extensive editing has been utilized in the preparation of the report in order that the data may validly serve the needs of dental education. Every attempt has been made to ensure that the data included in an income or expense category accurately fit the definition of the category.

The numbers included in parentheses ( ) indicate the numbers of schools in the associated categories.

13 Rank-Ordered Ratio of Clinical Faculty to Clinical Support Staff by Type of School, 1984-85 23

14 List of Disciplines Classified by Department, 1984-85 25

Introduction

The Annual Report on Dental Education and its accompanying supplements are intended to provide the Commission on Dental Accreditation, the community of dental educators and practitioners, state and federal agencies, and other interested groups with information on various aspects of dental education. The purpose of the present supplement, Dental Faculty Information, is to provide current and detailed information on the characteristics of the faculties of the 60 dental educational institutions located in the United States and Puerto Rico. The faculty information contained in this supplement is a summary of data obtained from the Survey of Dental Educators, American Association of Dental Schools. The support staff and enrollment information was obtained from the Annual Survey of Predoctoral Dental Educational Institutions, American Dental Association.

The information in this supplement has been presented in a set of 14 tables. The first 13 tables have been formatted in one of two ways. One format lists all 60 institutions either in alphabetical order by state or in rank order according to a particular characteristic. The other format lists institutions in either of these orders, however, they are first grouped according to their status as a public, private, or private-state-related institution.

In addition, the full time equivalents of faculty members have been reported in various tables according to academic discipline. These disciplines, however, have been grouped according to three broad areas, these are: basic science or biomedical, clinical, and auxiliary (see Table 14). Full time equivalents of those faculty whose primary responsibilities are administrative in nature are not included in the tabled values for these areas. Administrators have been excluded in an attempt to report undistorted student-faculty ratios for institutions, especially in the clinical sciences area.

Table 1 reports the full time equivalents for administrators, basic science and clinical science faculties. Definitions of full time vary widely across institutions. For the purpose of this supplement, full time status is defined as a standard of ten half-days devoted to the institution. All full time equivalents reported are based on this standard and include all faculty, regardless of their status as full time or part time faculty. Since the basic sciences are often taught by faculty other than the dental schools' faculties, the type of faculties presenting basic science instruction for the institution are indicated.

An analysis of the full time equivalents of faculty at each dental school would be incomplete without comparing the full time equivalents of the clinical sciences faculty members with student enrollment. The ratio of dental students to clinical faculty ranges from a low of 0.95 at Harvard University to a high of 8.74 at Creighton, with a mean ratio of 4.49 students to one clinical sciences faculty member (Table 2). Table 3 reports the same ratios rank-ordered and classified by type of institution.

Table 4 shows the ratios of total student enrollment (undergraduate and advanced specialities enrollments) to the total full time equivalents of the clinical sciences faculty. The mean ratio for all institutions is 4.93 students to one faculty member. The ratios range from 1.59 at Harvard University to 8.87 at Georgetown University. Table 5 shows the same ratios, classified by the type of institution and rank ordered.

Table 6 reports the full time equivalents for dental school faculty by department. The numbers of minority dental school faculty members are shown in Tables 7, 8, and 9. Tables 7 and 8 report the numbers of minority members by ethnic categories in the basic science and clinical science areas, respectively. Table 9 shows the number of women faculty members and administrators in dental institutions. The faculties of basic science, clinical science, behavioral science, and auxiliary are included.

The full time equivalents of support staff in the basic sciences and clinical sciences are shown in Tables 10 and 11, respectively. The full time equivalents for clinical support staff was selected for further analysis in Tables 12 and 13. Table 12 provides rank-ordered ratios of support staff to faculty for all institutions. As shown, these ratios range from a low of 0.44 support staff to one clinical faculty member at the University of California, San Fransisco to a high of 2.87 at the University of Mississippi, with a mean of 1.20. Table 13 shows the same information rank-ordered by type of institution. Table 14 shows lists of disciplines classified by department. This classification scheme was used throughout this supplement.

INTRODUCTION

The Annual Report on Dental Education and its companion supplements are intended to provide the Commission on Dental Accreditation, the community of dental educators and practitioners, state and federal agencies, and other interested parties with information on various aspects of dental education. The purpose of the present supplement, Dental Education Trend Analysis, is to provide information regarding trends in dental school applications and enrollments. Specifically, the information reported in this supplement includes numbers of applications, first-year and total predoctoral enrollments, attrition rates, numbers of graduates, first-year tuitions and fees, and licensure results. The tables that comprise this supplement are self explanatory and readily interpretable. A number of trends may prove especially noteworthy, however.

The values in Table 1 show that the number of applications to dental schools has declined by 6.8% from 38,004 in 1983 to 35,413 in 1984. This is the eighth consecutive year that a decline has been reported. This trend in the number of applications to dental schools reflects a decline in the number of applicants. Specifically, the number of applicants to dental schools declined by 9.0% from 7,128 to 6,490. The application to applicant ratio was 5.3:1 in 1983 and 5.5:1 in 1984.

Table 2 indicates that first-year enrollment (FYE) declined by 4.3% from 5,274 in 1983 to 5,047 in 1984. Table A below displays nine-year trend data on the number of applications, number of applicants, first-year enrollment, and the ratio of applicants to first-year enrollment. Since 1976, due to the reduction of the applicant pool, the applicant to first-year enrollment ratio has decreased from 2.49 in 1976 to 1.29 in 1984.

TABLE A

Year	Number of Applications	Number of Applicants	First-Year Enrollment	Ratio of Applicants/ First-Year Enrollment
1976	86,081	14,807	5,935	2.49
1977	81,765	12,837	5,954	2.16
1978	66,585	10,766	6,301	1.71
1979	58,715	10,000	6,132	1.63
1980	52,218	9,601	6,030	1.59
1981	46,894	8,852	5,855	1.51
1982	41,466	7,724	5,498	1.40
1983	38,004	7,128	5,274	1.35
1984	35,413	6,490	5,047	1.29

Tables 10 through 15 contain data on enrollments and graduates related to minorities and women. Table 11 indicates that first-year enrollment of women in dental schools increased 4.3% from 1,313 in 1983 to 1,369 in 1984. Table 13 indicates that there has been an increase of 19.7% in minority enrollment, from 873 in 1983 to 1,045 in 1984.

Table 18 contains licensure examination information for selected years from 1950 to 1983. The licensure results were obtained from the State Board of Dental Examiners, the Northeast Regional Board, the Central Regional Dental Testing Service, the Southern Regional Testing Association and the Western Regional Examining Board. Please note that because of the manner in which the data were collected and reported, those states participating in regional examinations have zero failure rates.

* - R = RESIDENT NR = NON-RESIDENT

+ - IN THIS REPORT THE 1981-82 FIGURE FOR COLORADO RESIDENTS ATTENDING U. OF COLORADO IS THE AMOUNT ACTUALLY PAID BY THE STUDENT AFTER TUITION REMISSION. IN ORDER TO ALLOW MEANINGFUL TREND ANALYSIS, FIGURES FOR THE PREVIOUS YEARS HAD ALSO BEEN ADJUSTED FOR REMISSION.

DENTAL STUDENT ATTRITION

Each year the Division of Educational Measurements gathers student attrition data from the 60 U.S. dental schools by means of the Survey of Predoctoral Dental Educational Institutions as well as through withdrawal forms submitted for each of the students who withdraw from school. Students who repeat an academic year are not included in these data. Between 1973 and 1979, the attrition rate after one full year of dental education was approximately 3.5% (see table 1). However, during the past four years the rate of attrition for the dental school freshmen has begun to climb, 4.30% in 1980-81, 4.95% in 1981-82, 5.6% in 1982-83 and 6.8% in 1983-84. During 1983-84, 138 sophomores (2.6% of the sophomore class) withdrew, while 80 withdrew from the junior class (1.5%) and 29 from the final year of dental education (0.5%). These 604 students amount to 2.82% of the total 1983-84 dental school enrollment.

Comparing the number of 1983-84 withdrawals with the number of students in their individual freshman classes permits a conclusion that an attrition rate of approximately 11 percent can be expected of a class of students for the four years of dental education. This rate of attrition has equalled the four year attrition rate of the 1966 entering class.

First-year attrition occurred in private schools with the same frequency as in public schools. Private school first-year attrition accounted for 48% of 1983-84 freshman withdrawals. Private schools accounted for 47% of first-year enrollment during that same year. The great majority of freshmen who withdrew did so voluntarily (77%). Approximately one-half of all freshman withdrawals were in good academic standing when they withdrew.

TABLE 1
DENTAL SCHOOL FRESHMAN CLASS ATTRITION
1973-74 to 1983-84

ACADEMIC YEAR	FIRST-YEAR ENROLLMENT	TOTAL FIRST-YEAR WITHDRAWALS	
1973-74			
% of Freshmen Enrollment	5,455	193	3.54
1974-75			
% of Freshmen Enrollment	5,617	209	3.72

% of Freshmen Enrollment	6,301	230	3.65
1979-80			
% of Freshmen Enrollment	6,132	216	3.52
1980-81			
% of Freshmen Enrollment	6,030	259	4.30
1981-82			
% of Freshmen Enrollment	5,855	290	4.95
1982-83			
% of Freshmen Enrollment	5,498	306	5.57
1983-84			
% of Freshmen Enrollment	5,274	357	6.77

Personal Reasons for Withdrawal

Personal reasons for withdrawal have, in recent years, outnumbered academic reasons (see table 2), while a change of career objective remains the most frequently reported personal reason for withdrawal from dental school (table 3). Most of these students were in good academic standing and had no reported difficulty with coursework, but they withdrew to follow a career other than dentistry. During the 1983-84 year, 6 students left dental school explicitly to enter a medical school and 18 students left a particular dental school to transfer to another dental school. Ten of these 18 students were freshmen. Financial reasons were given for the withdrawal of 17 students, 14 freshmen and 3 sophomores.

Table 2
REASONS FOR FRESHMAN ATTRITION 1983-84

	1979-80	1980-81	1981-82	1982-83	1983-84
Withdrawals for Personal Reasons	52.3%	65.3%	59.0%	53.9	57.9%
Withdrawals for Academic Reasons	47.7	34.7	41.0	46.1	42.1
Problems in Didactic Courses Only	27.3	18.5	24.5	25.4	21.7
Problems in Technic Courses Only	5.6	7.3	4.5	3.0	4.2
Problems in Didactic & Technic	14.8	8.9	12.1	17.7	16.2

PERSONAL REASONS* FOR WITHDRAWALS, 1983-84

	Freshmen	Sophomore	Junior	Senior	Total
Change of Career Objective	51	13	7	2	73
Other General Reasons	28	6	3	10	47
Transfer to Other Dental School	10	4	3	1	18

Emotional Problems	2	0	1	1	4
Disciplinary Suspension	0	1	1	1	3

* Reasons for withdrawal are sometimes not specified.

ACADEMIC REASONS

In annual studies of dental freshman attrition, a comparison between the DAT scores of students withdrawing because of academic problems and the DAT scores of all freshmen has been done. Since 1975, when this analysis was initiated, the studies indicated that the percentage of these students with below average DAT scores was significantly greater than the percentage of all freshmen with below average DAT scores. This year, again, there is a significant difference in the DAT scores of those who withdrew because of scholastic difficulty and the rest of the freshmen. The mean DAT Academic Average of those withdrawing for personal reasons was 4.15 (somewhat lower than the mean for all freshmen, 4.47), while those withdrawing because of problems in academics have a significantly lower mean DAT Academic Average, 3.44. This difference is in evidence in the technic area also. The mean Perceptual Ability Test scores for those withdrawing for personal reasons was 4.04; for those withdrawing because of problems in technic courses, 3.20; all freshmen, 4.61. Figures 1, 2 and 3 graphically portray these differences. Freshmen who withdraw because of problems in academic or technic coursework continue to have, on the average, significantly lower DAT scores than other first-year students.

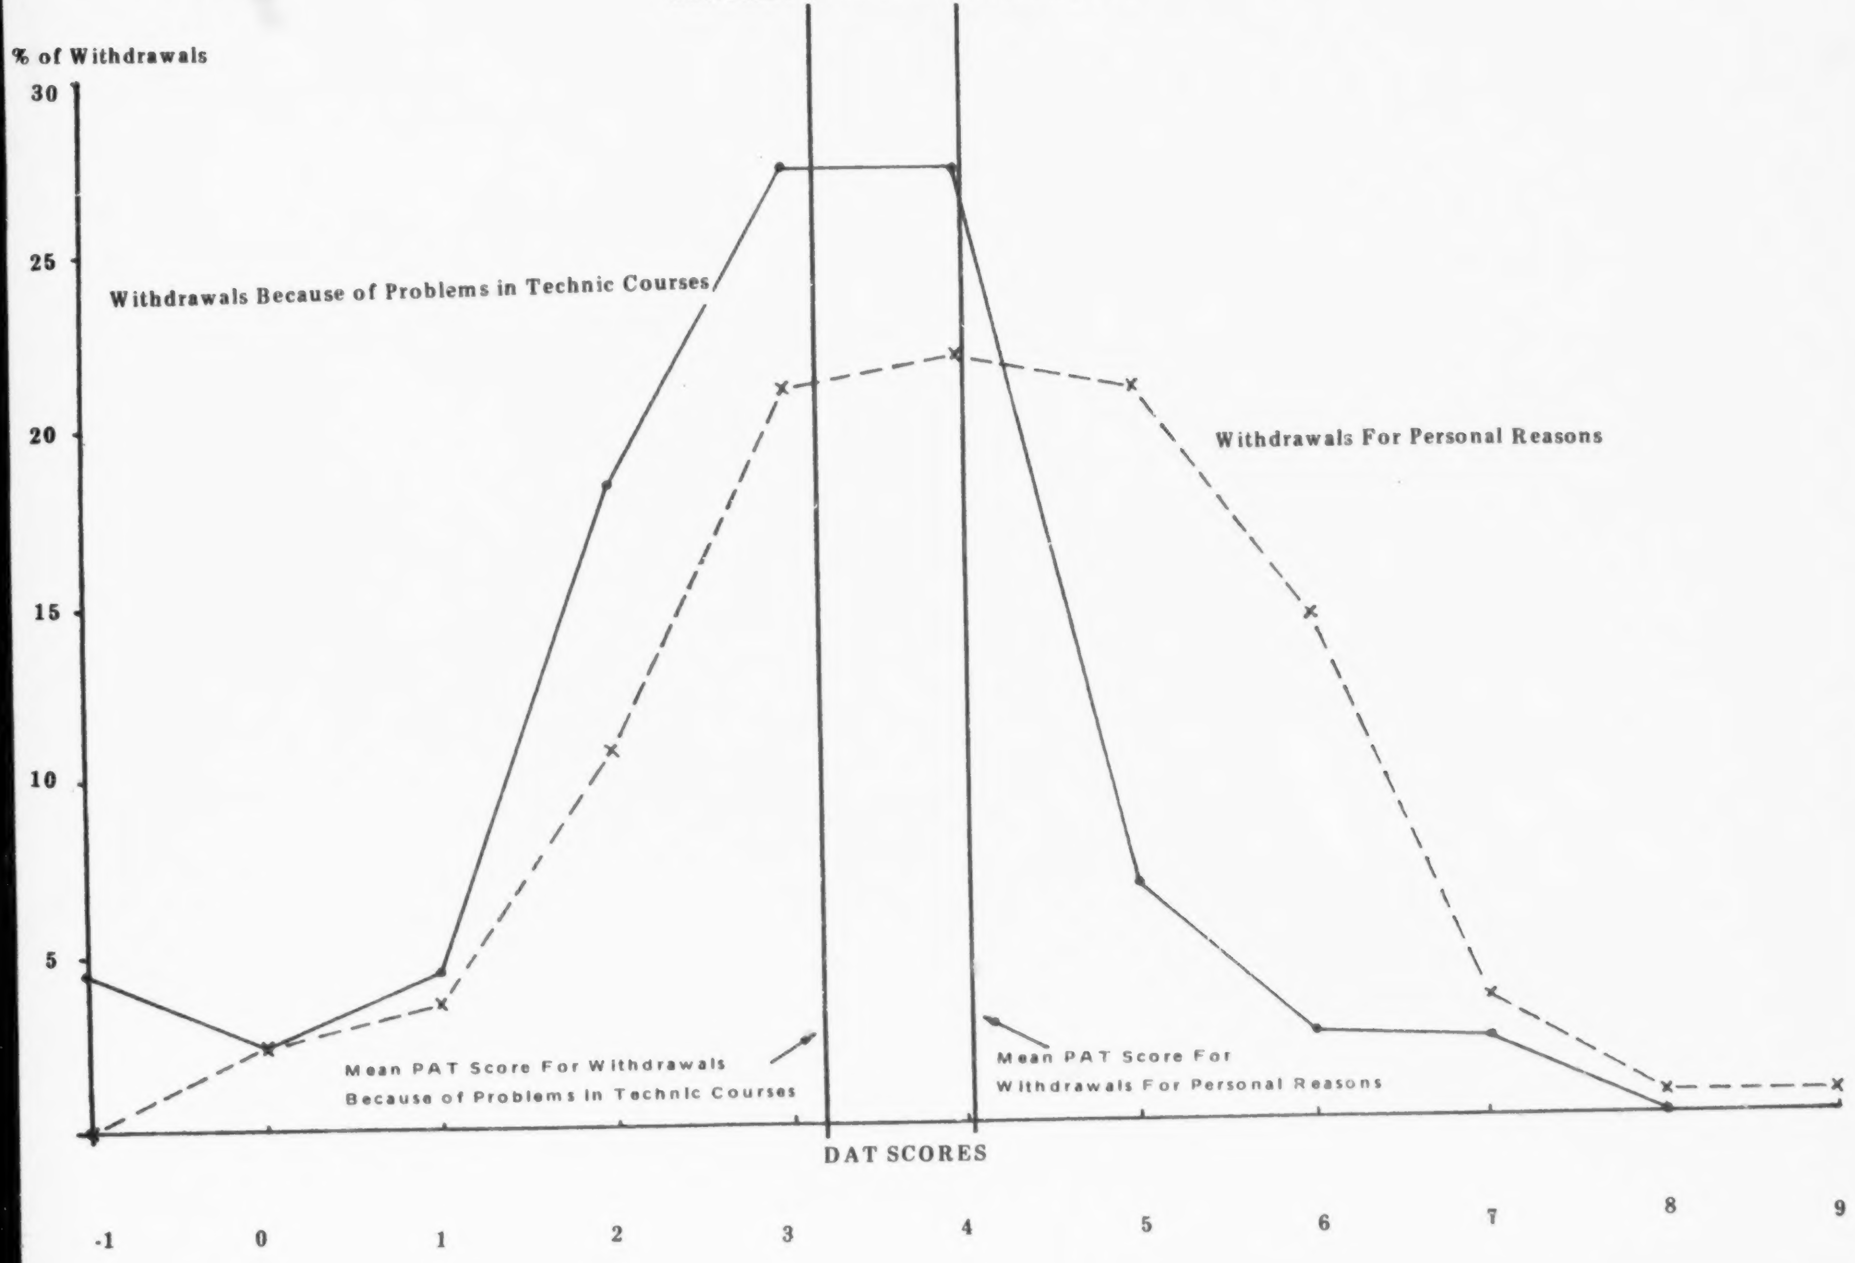
DENTAL FRESHMAN WITHDRAWALS



MINORITY ATTRITION

In 1983 women constituted 24.9% of the entering class in U.S. dental schools and 22.1% of the entire dental enrollment. Women, however, made up 24.1% of the first year withdrawals and 24.5% of the withdrawals from all four years. As can be seen from Table 4, the attrition rate for women in dental school was slightly higher than for men in 1983-84.

TABLE 4

SEX DIFFERENCES

ATTRITION, BY SEX, FROM TOTAL ENROLLMENT 1983-84

	Freshman	Sophomore	Junior	Senior	Total
Male	271	99	56	24	450
% of Male Enrollment	6.8	2.4	1.3	0.6	2.7
Female	86	39	24	5	154
% of Female Enrollment	6.5	3.4	2.1	0.5	3.3
Total Attrition	357	138	80	29	604

TABLE 5

1983-84 FRESHMEN DENTAL STUDENTS

Race	#	% of Withdrawals	Total * 1st Year Enrollment	% of Enrolled
American Indian	2	0.56	19	0.36
Asian or Pacific Islander	19	5.32	406	7.80
Black	51	14.29	276	5.30
Hispanic	12	3.36	172	3.30
White	252	70.59	4,334	83.23
Unknown	21	5.88		

*U of Puerto Rico not included

An analysis of student attrition by ethnic minority categories indicates that Black students withdraw at a greater rate than other students. As Table 5 indicates, Black students account for a disproportionately large percentage of withdrawals as compared to their percentage of enrollment.

TABLE 6

General Reason for Withdrawal

Race	Total # Withdrawn	Personal	Scholastic
American Indian	2	50%	50%
Asian or Pacific Islander	19	54%	46%
Black	51	32%	68%
Hispanic	12	60%	40%
White	252	61%	39%

Table 6 indicates that the greatest proportion of the 1983-84 freshman withdrawals of Black students were for scholastic reasons related to coursework. This is not the case for withdrawals in general.

CONCLUSION

In summary, the freshman attrition rate which had been consistently held to approximately three and one half percent during the 1970's has increased to over 6% in 1983-84. The national dental school entering class can be expected to experience approximately an 11% attrition rate by the time of graduation, if one takes the 1983-84 rate of attrition as a base. The students withdrawing for personal, non-academic reasons continue to out-number those withdrawing because of academic problems. Freshmen withdrew from school more often because of academic problems in didactic courses than in technic courses, both areas of difficulty having a significant relationship to Dental Admission Test scores. Finally, the attrition rate for women is slightly higher than for men and is also higher for Black first-year students than for other freshmen.
